Report Overview: This publication on the Status of Women in Maury County is part of a statewide publication of the Tennessee Economic Council on Women, *The Status of Women in Tennessee Counties, 2004*. The Economic Council on Women is a State agency created under TCA § 4-50-100, et seq. by the One Hundredth General Assembly in 1998 to address the economic needs of Tennessee women.

The Status of Women in Tennessee Counties

MAURY

Women have taken remarkable strides towards economic equality, from education to earnings to political participation. Women are now pursuing goals such as business ownership, leadership roles in their careers, and election to state and federal political office. However, obstacles still exist in the climb toward equality. Nationwide, equal numbers of men and women are obtaining four-year college degrees; however, these gains have not translated into pay equity. The average college-educated woman working full time earns \$44,200 a year compared to \$61,800 for men in the same category. Women are still under-represented in many of the highest paying, fastest growing sectors of the economy. Helping women break into these traditionally male-dominated areas like computer science, engineering, mathematics and technology, as well as all skilled-labor positions, gives women tools for self-sufficiency and understanding of their personal capabilities, and these advances are good for the economy of our counties and of our state.

Employment and Earnings

The employment and earnings index includes data on women's annual earnings, the earnings gender gap, female labor force participation rate, the female unemployment rate, and the percent of women in managerial or professional occupations.

- ◇ Women in Maury County have median annual earnings of \$23,334 and men in the county have median annual earnings of \$37,675.
- ◇ Despite ranking in the top 20 counties in annual earnings for women, Maury County has a wage gap only exceeded by two other counties.
- ◇ Maury also ranks among the top 20 counties in women's labor force participation rate (45.2%) and female unemployment rate (4.3%). Women represent 45.4% of the county's labor force.
- ◇ Among all working individuals, 24.8% of workers in Maury County are employed in professional or managerial occupations, and when employed females are considered, the percentage increases to 25.7%.

Economic Autonomy

The economic autonomy index includes information on educational attainment, business ownership and general quality of life issues.

- ◇ There are over 6,000 women in the Maury County who do not have a high school diploma; however, about the same percentages of men and women in the county have a high-school level degree. 77.9% of all residents have a high school diploma.
- ◇ While 13.6% of all county residents have a four-year college degree, 22.0% of women have a bachelor's degree or better.
- ◇ 13.0% of women in Maury County earn income below the poverty level.
- ◇ Though 8.3% of families are in poverty in the county, the percentage rises to 29.0% for families with a female householder and no husband present.
- ◇ Despite making up almost 20 percent of the private businesses in the county, women-owned businesses only account for 1.4% of the total sales and receipts of privately-owned firms in Maury County.
- ◇ Women represent 53.0% of eligible voters in Maury County, and just 5 out of 29 elected county officials are women.

ABOUT THE COUNCIL AND THIS REPORT

Maury County

The Status of Women in Tennessee Counties report offers an economic profile of women in each county of Tennessee and examines how women's rights and equality vary among the counties. The report presents data and overall rankings in two categories of women's economic status: employment and earnings and economic autonomy. Indicators of women's status in each category make up the composite rankings of the counties.

The employment and earnings section presents data on women's annual earnings, the earnings gender gap, female labor force participation rate, the female unemployment rate, and the percentage of women in managerial occupations.

The economic autonomy section includes information on the percentage of businesses owned by women, educational attainment levels, percentage of households headed by a single female, single female headed households living in poverty, percentage of women with health insurance, the high school dropout rate and the teen pregnancy rate.

The **Tennessee Economic Council on Women** was created in 1998 by the Tennessee General Assembly to assess Tennessee women's economic status. The Council develops and advocates solutions to address women's needs in order to help women achieve economic autonomy. In setting its priorities, the Council selects issues that are timely and likely to result in positive changes for women.
